Figure S1. Individual values for blood pH. Pre = immediately before the dialysis session (numbers 1 and 2 refer to the first and 2nd sessions of the week); Post = after the first dialysis session of the week (numbers refer to minutes after the end of the session); Interval = 20 hours after the end of the first session of dialysis of the week.
Figure S2. Individual values for serum bicarbonate. Pre = immediately before the dialysis session (numbers 1 and 2 refer to the first and 2nd sessions of the week); Post = after the first dialysis session of the week (numbers refer to minutes after the end of the session); Interval = 20 hours after the end of the first session of dialysis of the week.
**Figure S3.** Individual values for blood pCO$_2$. Pre = immediately before the dialysis session (numbers 1 and 2 refer to the first and 2nd sessions of the week); Post = after the first dialysis session of the week (numbers refer to minutes after the end of the session); Interval = 20 hours after the end of the first session of dialysis of the week.
